Details

Written by Yvonne Poe

Our famous Arizona autumn weather showed itself for the Kentucky Camp Score-O, held this past Sunday on October 9th. **Larry Petersen** set a fun and challenging course, liberally interspersing technical and less-technical controls of varied point values. This allowed everyone opportunities to visit high point value controls, not only those fit to run the perimeter of the course.

Controls were grouped to account for 5 point, 10 point and 15 point control values. Participants were also able to select from 1-, 2-, and 3- hour options. Categories did not need to be chosen until checking in at the finish, allowing for flexibility depending on what sort of day one was having out on the course or a mechanism to avoid overtime penalty point deductions. Competitors taking longer than 3 hours were penalized 1 point per minute (or fraction thereof).

Tim Black, newly transplanted from Maryland, and **The Trailblazers** from GPHXO, joined with other newcomers for the beginner's clinic, which was led by **Peg Davis**. Peg did an excellent job, as everyone returned safely back to the Start/Finish area.

With hunting season upon us, Larry had to make a last-minute adjustment to the Start triangle location as a large RV had parked on top of his original choice! All of the controls were hanging where placed, neither man nor beast having relocated them.

Larry Petersen and **Yvonne Poe** were able to pick up a few of the controls at the conclusion of the Score-O, but there are several more that need to be gathered up. Anyone who can assist with retrieval is asked to contact Larry at rlpederse@misericordia.edu for a copy of the map.

Thank you all for coming out, **Larry** for setting the course and **Peg** for conducting the beginner's clinic!
